Conclusion/Brief comment:

This is a retrospective application to raise the ground level of the rear garden by just over 150mm with concrete gravel boards and fencing on the three sides as the boundary.

The change in levels will not have a detrimental impact on the character of the local area where the Le Fort footpath to the east is situated at a higher level and where changes to ground levels in the vicinity (land to the east and west) has been altered in connection with development that is being undertaken at that site.

The change in levels will not result in unacceptable overlooking or loss of privacy to surrounding residential neighbours given the relationship of the land to those adjoining properties.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
