Consultation - The Office of Environmental Health and Pollution Regulation:

"I have reviewed the proposed plans to erect outbuilding/garden room to south-west boundary which were received by email on 12th December 2025 and there is an issue of concern that I must raise. Historic records indicate there has been a domestic greenhouse on the site in 1980. There may be land contamination from this greenhouse, likely from lead and possibly asbestos. However, given the domestic only use of the greenhouse and limited records, the Planning Authority may want to consider applying a discovery strategy as an informative to the applicant.

Discovery Strategy

If, during development, contamination not previously identified is found to be present at the site, no further development shall take place until the developer has submitted a method statement to the Authority to identify, risk assess, and address the unidentified contamination, and has obtained written agreement from the Authority for the works to proceed. Any subsequent development must be carried out in accordance with the conclusions and recommendations of the approved report."

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
