Conclusion/Brief comment:

This is a variation to a previously approved application, FULL/2024/0829, the variations are to remove the chimneys, a minor amendment to the front porch, cladding of front dormer cheeks and combine the three rear dormers into one large dormer with three windows to the rear.

The rear dormers cannot be seen from many public vantage points. The proposal variations are considered to achieve a good standard of design, using materials which complement the existing materials. The changes will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the variations are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
