Conclusion/Brief comment:

This application is to install external steps with railings and alterations to existing raised terrace area to southwest of the property.

The proposals are to redesign the external patio areas by adding some steps and railings connecting the two levels which previously were not and adding flowerbeds.

The proposals achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
