Conclusion/Brief comment:

Policy LC3(A) sets out that proposals for extensions/alterations to existing social and community facilities will generally be supported where the proposal is of a scale that is appropriate to the Local Centre concerned and where it will not have a negative effect on the vitality and viability of the Main Centres.

The extension proposed is not to enlarge the surgery in terms of consultation rooms/services provided but simply to alter and improve access and associated facilities for patients. The extension will not result in harm to the vitality and viability of the Main Centres.

The proposed extension represents a good standard of design that respects the existing building and the character and appearance of the locality. It will not result in harm to the amenities of surrounding residential properties in terms of overlooking or overshadowing.

The position of the extension, in the position of an existing extension to be replaced ensures that the works will not impact on the level of off-road parking associated with this development.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

In view of the above it is recommended permission is granted.
