Conclusion/Brief comment:

This application is to replace the west hand side of the ground floor shop front.

The proposal is to remove all of the rotten timber and the glass window to see the extent of the damage, possibly replace all of the timber work and replace the window with an additional transom that lines through with the right hand window design. The replacement shopfront will be of a similar design and appearance to the existing.

The proposal is considered to achieve a good standard of design, using materials which complement the existing materials. The replacement window is not considered to have a detrimental effect on the character and amenity of the

surrounding conservation area, nor will it have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
