Conclusion/Brief comment:

This application is to install a pitched roof dormer window and rooflight to the front roof slope and a large flat roof dormer with three windows to the rear roof slope to create two bedrooms and a bathroom on the first floor.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The dormers will provide adequate levels of sunshine and daylight and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new dormers are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours due to the mitigating measures for the glazing.

With regard to privacy, views from the proposed dormers towards the garden areas of neighbouring properties will be possible. However, by virtue of a combination of the angle of view, and the distance to the neighbouring properties, the degree of harm caused by the windows at first floor level in the north facing elevation is unlikely to be so significant as to have a material adverse effect on the amenities of the neighbouring residents. The applicant's agent has stated that a control film will be applied to the windows serving the proposed bedroom to prevent overlooking, however given that this could be removed at any time and is not required to make the development acceptable this cannot be enforced or controlled by a planning condition. It is considered therefore that any harm to the amenities of nearby residential properties resulting from the proposal would not be so substantial to warrant the refusal of planning permission in this instance.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
