Conclusion/Brief comment:

Permission is sought to erect a single storey flat roof car port to the north-east elevation of the garage, clad in millboard in burnt cedar, and to erect a pergola to the south (rear) of the existing dwelling, built off an oak clad wall on the west boundary.

The proposed car port would project away from the existing built form to abut the existing roadside boundary treatment, to the side of the existing dwelling and away from nearby residential property. Taking into account the ancillary nature of the car port relative to the existing built form at the site and position to the side of the dwelling, it is considered, on balance and provided that the roadside hedge is retained, that the car port would not have significant adverse impacts on the character of the area. Following deferral, a section drawing has been provided demonstrating that the car port would be constructed off an existing wall and the construction should not compromise the retention of the hedge.

The pergola and associated wall would be built against an existing high boundary wall, set away from the public highway, and would have no adverse impacts on the character of the area or neighbour amenity.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
