OFFICER'S REPORT

Brief Description of the site:

The property known as 'Milcosa' is no. 10 of a row of thirteen pitched roof cottages which are set back from and face north over Croutes Haviland (the road is at a much lower level). To the east and west are neighbouring cottages, across the road to the north is a detached dwelling and to the south a neighbours garden and open land beyond. The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to partially demolish the rear extension and erect a single storey rear extension and insert a large rear dormer window to the south rear elevation. The rear extension will house an open plan dining/kitchen area open to the lounge (within the existing dwelling). The large dormer will help to enlarge the two bedrooms upstairs to be doubles and two ensuite bathrooms.

Initially the dormer was the whole width of the cottage with large windows which could cause overlooking into the neighbours gardens, the application was deferred to request a reduction in the size of the dormer and mitigation for the possible overlooking. Amended drawings have been submitted showing a 1.2m reduction in the dormer width and top hung window openings with obscure glazing below in the bedrooms and obscure windows in the bathrooms.

The rear of the building is not prominent, if visible at all, from any public vantage points and so the proposals will have a limited impact on the character and appearance. The dormer window does not achieve a high standard of design. However, the site is not within a Conservation Area and the dormer window would not cause sufficient harm to the appearance of the surroundings and the character and amenity of the locality to outweigh the support and flexibility for extensions and alterations to existing residential buildings as set out in Policy GP13. As a result, the design of the proposal does not conflict with Policies GP8 and GP13. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension and dormer window are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours. The use of obscured glazing to the rear first floor windows will minimise the impact on the amenities of neighbouring residents.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
