Conclusion/Brief comment:

This application is to erect a raised terrace area and a boundary fence to the south of the property. The terraced area will be within the same footprint as the previous decked area, which has already been removed. The area will be laid with stone slabs rather than decking on a concrete pad.

Previously the decking sat on a concrete slab close to the house, but then was propped up on timber posts at the edges, these have all since been removed. The proposal is to create a low retaining wall around the perimeter of the terrace to fill with a concrete slab to then pave over with the finished slabs.

The height of the finished terrace will be the same as the previous decking and so there will be no increase in possible overlooking (the properties are slightly lower than each other going eastward). Plus the south boundary and much of the east boundary fencing is to be replaced with new at a slightly higher level than at present to further mitigate any possible overlooking.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any significant adverse impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
