**Conclusion/Brief comment:**

This application is to demolish the two separate stable blocks, which were damaged when some trees came down in the last big storm. The block outbuilding had been built at the same time as the main dwelling, but it is unknown when the timber built stables were constructed because the aerial photos show the crown of a tree on all photos after 1979.

Without an existing plan it is presumed that the old blocks had four stable bays (two in each structure) and an area for storage, but these were ad hoc and not specifically built for the horses, whereas the new stable block is purpose built just for them, with a separate tack and storage room.

The proposals are considered to achieve a good standard of design, using natural materials which complement the surrounding area. The stable will provide adequate levels of space and four bays for the horses.

The scale and massing of the new stable block is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

The hardstanding is within 30m of the property and is to be in association with the stables and therefore it is considered appropriate and acceptable.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
