Conclusion/Brief comment:

This application is to erect a two storey extension to the rear south elevation of the main dwelling to enlarge the lounge at ground floor and the master bedroom at first floor, plus a single storey extension to the front north extension to enlarge the lounge at ground floor.

In 2020, exactly the same application was submitted and approved, but never built and after three years the approval expired. This is a second application for the same proposal, albeit three years since the last application expired. During this time there have been no changes in or around the site to warrant any changes.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
