Conclusion/Brief comment:

This application is to convert the attic space of the cottage to provide two bedrooms and a bathroom at first floor level by erecting a dormer window with small balcony and rooflight to the northeast rear elevation and two small pitched roof dormers and a small rooflight to the southwest front elevation.

Adding two small pitched roof dormers on the front façade will suit the style and age of the cottage, and the rear elevation rooflight and dormer are also considered to be appropriate and acceptable.

There will not be any overlooking from the first floor balcony as it will only overlook the applicants own garden and the neighbouring old vinery land to the southeast.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The proposals will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The proposed works are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
