OFFICER'S REPORT

Brief Description of the site:

The property known as 'La Terre Norgiot' is a 19th century traditional granite faced farmhouse, which has been extended several times over the years to form a large courtyard property. The house sits in the north of the plot with a neighbouring property to the north, to the east is Rue de la Terre Norgiot, part of the house and a granite wall forms the east boundary. To the south is a large garden and then open fields and to the west is open fields. The property is located Outside of the Centres, but is within the Agriculture Priority Area as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to erect a first floor timber balcony on the west gable, change two windows to door sets on the west elevation, and install a flue to the east facing gable.

The extractor for the flue already exists, so adding the flue would prevent the granite gable from discolouring. As the gutters also drop down on this gable as long as the flue is black to match the guttering it will not be as noticeable. This can be conditioned.

The 3m x 4.9m timber oak frame balcony would be located on the west elevation away from any public vantage points, and be pretty self-supporting only touching the granite gable lightly. The balcony is not considered to be an inappropriate addition to the property.

The existing first floor window will be swapped for double doors with two full height side lights, to allow entrance to the balcony, and a matching door set will be inserted into the ground floor wall where the main kitchen is located on the same elevation.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The proposals will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours as they are all too far away to be affected.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
