Conclusion/Brief comment:

This application is to erect a replacement balcony to the west front elevation, install an external insulating render system (EIRS) to the internal courtyard and some alterations to the fenestration of the main dwelling and the outbuilding.

The internal courtyard EIRS is considered exempt works and therefore will not be assessed as part of this report.

All of the proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The balcony and new

fenestration will provide adequate levels of sunshine and daylight and give the occupiers flexible and adaptable accommodation.

The scale and massing of the new balcony is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours. None of the proposals will have any impact on the setting of the nearby protected building.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
