Conclusion/Brief comment:

This application is to demolish the existing outbuilding and erect a single storey pitched roof outbuilding in the southeast corner of the site and alter the hardstanding along the south boundary of the site of this protected building.

The outbuilding will be 35sqm in size with a 4m wide garage door on the west elevation and a window and glazed door on the north gable end of the outbuilding. As the outbuilding is only single storey there are no overlooking issues.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The outbuilding will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new outbuilding is not considered to have a detrimental effect on the special interest of the protected building, or the character and amenity of the surrounding area, neither will it have any impact on the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
