OFFICER'S REPORT

Brief Description of the site:

The property known as 'Les Pres' comprises the main dwelling and an attached barn which has been converted into a cottage. The property is set back from and face south onto Rue des Fontenils. There are two neighbours, one to the northwest and the other to the southeast. To the west and southeast, across the road, are open agricultural fields (APA). To the east across the road is open land not in the APA. The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to install replacement windows to the south front elevation of the main dwelling and the adjacent converted barn, now known as the cottage.

The property is located at the western edge of the St Pierre du Bois Church Conservation Area, the dwellings are separated from the rest of the Conservation Area because of its position across a valley on a small lane. Due to this separation the windows are not considered to be a defining characteristic of the Conservation Area and, in this instance, can be allowed to change.

The replacements must be appropriate and sustain the character of the surrounding Conservation Area. The main dwelling has six over six sash windows with no horns, and the cottage has a less formal layout including casement windows. The information submitted did not clearly demonstrate replication of the existing window styles and it is therefore recommended that a condition requesting large scale drawings is added to the decision notice to ensure the 'like for like' replacements are consistent with the originals, bar the change in material.

Provided the windows are 'like for like', the use of uPVC is not considered to have a detrimental effect on the character and amenity of the surrounding conservation area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
