Conclusion/Brief comment:

This application is for a variation to the previously approved application, FULL/2025/1558. The variation is to omit the first floor extension and create a first floor dormer window instead on the west (rear) elevation.

The dormer extension will not be seen from the front of the building. The dormer extension will be visible from Fort Field to the west, nonetheless, the scale and massing of the new dormer is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have an unacceptable impact on either of the immediate neighbours.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The dormer will provide adequate levels of sunshine and daylight and give the occupiers more flexible and adaptable accommodation.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
