- GP9 – Sustainable Development

Conclusion/Brief comment:

Planning permission is sought for the erection of an external lift shaft on the south-west elevation of the clubhouse, together with alterations to the existing fenestration.

Policy OC9 of the Island Development Plan (IDP) identifies golf courses and associated development as a form of Outdoor Formal Recreation and supports proposals for the extension, alteration or redevelopment of existing facilities.

The proposed lift shaft is modest in scale, measuring approximately 1.5m by 1.5m with an overall height of 5.6m above ground level. Given its limited size and position on the building, it would not result in any material harm to the visual character or appearance of the site or the surrounding area. The proposed alterations to the fenestration are also sympathetic to the design and appearance of the existing building.

The development will improve accessibility within the clubhouse, providing safe and convenient access for all users, in accordance with the aims of Policy GP8.

The site does not lie within an Agricultural Priority Area, and the proposal would not adversely affect the amenities of neighbouring properties. The development is therefore considered to accord with Policies OC9, GP1 and GP8 of the IDP.

Sufficient information has been submitted to demonstrate that the proposal has been designed in accordance with sustainable design principles and therefore complies with Policy GP9 of the IDP.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
