Conclusion/Brief comment:

This application was to erect a 0.65m high fence on top of the existing 1.3m high granite boundary wall from the south end of the west boundary up to in line with the front façade of the property, approx. 44m.

However, a 44m length of horizontal fencing above the granite wall raised concerns about its design and impact on the character and visual amenity of the area.

The application was deferred and now the southern 24m of the wall will have a hedge planted on the inside of the wall, which will in time grow up and screen the garden. Closer to the dwelling where the patio butts up against the boundary wall there is no provision to plant a hedge, in this area the wall will be built up to a height of 1.9m high for 9m south of the pedestrian gate and 4m to the north of the pedestrian gate.

At present due to the low height of the wall (approx. 1.5m) the property has a limited degree of privacy. Building up the wall close to the house and planting a hedge adjacent to the garden will improve the privacy whilst using methods that are common in the area, such as granite walls and natural hedge screening.

The proposals are now considered to achieve a good standard of design, using materials which complement the existing materials. The proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
