Conclusion/Brief comment:

This application relates to the existing outbuilding which is located to the east of the main dwelling at a slightly higher level. It is to raise the roof ridge height by 1.2m to allow for some storage at first floor level, install rooflights and erect a car port on the northeast elevation. Alterations to the cladding and alterations to the fenestration.

The ground floor will create a garage/workshop (southeast end), an extra utility room and there will be a gym/work space at the northwest end of the building.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The alterations will provide adequate levels of sunshine and daylight and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new higher ridge line is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
