Conclusion/Brief comment:

This application is to install a shepherd hut to the north of the existing outbuilding along the east boundary of the site. The hut will be used as an ancillary living unit (ALU).

As initially submitted, there were concerns that the hut, which was to be mounted on wheels, would be regarded as a movable structure. Habitation within movable structures is not supported. Following deferral, the applicant has agreed to omit the wheels and support the structure on a more permanent base. This will be conditioned.

The shepherd hut is 6.7m long and 2.9m wide (19.4sqm) and houses a small double room, kitchen/diner, with fold down bunks beds and a small bathroom. It is a small, but usable ALU which does not require any substantial ground works and would be easy to relocate should circumstances change.

The ALU will not have a family member living in it permanently, it will be used as occasional guest accommodation. It will share the garden, parking, all utility bills and will remain ancillary to the main dwelling.

The proposals are considered to achieve a good standard of design. The hut will provide adequate levels of sunshine and daylight and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new hut is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
