Conclusion/Brief comment:

This application is to slightly alter the ground levels to install a swimming pool and associated hardstanding around the pool, plus erect a summerhouse and a small shed to be the plant room.

The summerhouse constitutes exempt development and therefore does not form part of the assessment in this report. The plant room and swimming pool require planning permission solely because they are located beyond the principal dwelling and closer to Clos Beaumont than the main house.

However, views of the proposed development from the clos road would be effectively screened by the mature planting along the western boundary, comprising a mixture of established trees and shrubs. The vegetation is sufficiently dense to

prevent meaningful views into the site. Consequently, the siting of the swimming pool and associated hardstanding is considered appropriate and acceptable, as it would not adversely affect the character or appearance of the clos.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
