OFFICER'S REPORT

Brief Description of the site:

The property known as 'La Marette' is a large detached two and a half storey dwelling, the main part of the dwelling was built in the early 20th century and it was re-modelled and extended at the turn of the 21st century. The building is set back from and faces northeast onto Rue des Marettes and is situated within a large site. There is one neighbour to the north across the road. Other than the northerly neighbour the property is surrounded by agricultural land and is located within the Agriculture Priority Area. The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to erect 2m high solid timber gates, 5m into the site, on the secondary entrance which is located at the southern end of the southeast boundary.

The gates being set 5m into the driveway means that cars can pull totally off the highway in order to open the gates, which negates the highway being blocked. The gates are made of a natural material which is in keeping with the rural nature of the surrounding area.

The proposals are considered to achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the new gates are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
