Conclusion/Brief comment:

The current application proposes to vary the approved works for construction of a replacement dwelling, altering the roof material from zinc to eco slates. Confirmation has been provided that the slates will be laid in "portrait", not in the "landscape" format used for the sample panel on site.

The proposed eco slates are not considered to form a high quality material however, in this case and taking into account the particular circumstances of the site, including the location outside of any areas of particular designation, in an area of loose grain mixed development, the design of the building and set back from the road, together with the sustainability credentials of the product as set out in the submitted supporting material, it is considered that there is insufficient grounds to object to the proposal.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
