Conclusion/Brief comment:

This application is a variation to the previously approved application, FULL/2025/0990, the variation is to re-orientate the granite walls around the vehicular entrance and to change the style of the gates.

The walls adjacent to the gates are to be altered to add a turning point for larger vehicles, and to provide a bit more room externally.

The proposals are considered to achieve a good standard of design, using material which complement the existing materials. The new gate is more like a traditional 5 bar field gate, which isn't solid timber, and is considered more appropriate for the rural setting.

The scale and massing of the altered boundary wall is not considered to have a detrimental effect on the character and appearance of the surrounding area, nor will it have any impacts on any of the nearby neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.
