Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land Planning and Development (General Provisions) Ordinance, 2007 have been taken into account in the assessment of this application.

The proposed extension adopts a good standard of design by virtue of its scale, form, massing, siting and materials. The extension is subservient to the main dwelling and adopts a material palette which reflects and respects those materials used on the main dwelling. The form of the entrance porch has also been carefully designed which mirrors the roof forms at first floor level, including the pitched roof gable and front facing gabled dormer window, while the office/fourth bedroom adopts a hipped roof design.

While the extension will be visible in public vantage points along Rue De Putron, the proposal will not have a detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents.

The other changes to the exterior of the property in terms of the replacement fenestration and new parapet wall will have a negligible effect.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies, and accords with the purpose of the Law and the Material Planning Considerations. It is therefore recommended that planning permission be granted, subject to conditions.
